## Winter is Coming ... Be Prepared With Parker!

If last year's winter caught you off guard, don't let it happen again! With Parker Oil & Propane, you can protect yourself from mid-winter breakdowns, an empty oil tank and more thanks to the residential heating services we offer that guard you from the chill of winter!

### Here's how we can help:

**Heating System Installation** We can install modern, high-efficiency heating equipment in your home saving you up to 40% on fuel costs.

**Annual Tune-Ups** Regular maintenance allows our expert technicians to catch any small problem and resolve it before it turns into a complete system breakdown.

**Automatic Delivery** We'll set your delivery schedule based on past usage and make modifications to accommodate for severe weather conditions.

**24-Hour Emergency Service** No matter the time of day (or night) our technicians will be there for you if your heat doesn't turn on when you need it to.

**Be Prepared!** With these services from Parker Oil & Propane, you won't get caught in the cold! Do yourself a favor and [contact us today](#) so we can help you prep your home for winter.

## Help Maintain Propane's Long Streak of Safety

*If you smell propane...*

- Put out all smoking materials and open flames
- Leave the area immediately
- If safe to do so, turn off the main gas supply valve on your propane tank by turning the valve clockwise (to the right)
- From a neighbor's home or another building, call Parker Oil & Propane. If you can't reach us, call 911 or your local fire department

- Keep away from the area until it is cleared by a Parker technician, or a first responder
- Before you attempt to use your propane appliances again, be sure to have your system inspected by a Parker technician in order to prevent any future problems

***If there's ever a question of safety when it comes to your propane appliances or supply, you can give us a call at 800-486-3146 or [contact us online](#) through our website.***

## Bring Some Extra Warmth into Your Home With a New Fireplace

You can enhance the comforts of home with a newly installed [propane fireplace](#) from Parker Oil & Propane! Why should you choose propane over wood? Here are a few good reasons!

- **Constant Heat:** Propane fireplaces provide a constant supply of heat.
  - **No Sparks:** There are no embers or any ash
  - **Save Energy:** Using a propane fireplace instead of your heating system can save you up to 25% on heating costs
  - **Much Safer:** There are no fumes or particulates being released into the air

If you've always wanted a propane-fueled fireplace to wind down in front of after a cold day, look no further than Parker Oil & Propane for affordable products and expert installation! [Contact us now](#) to learn more.

## Find Some Financial Breathing Room With Our Payment Options

The heating season can put a lot of strain on your bank account. Luckily, at Parker Oil & Propane we offer two ways to help you control your fuel costs during the heating season: our **Capped Price Program** and our **Budget Payment Plan**.

With the **Capped Price Program\*** you get...

- A predetermined capped propane price
- Peace of mind in knowing that your propane costs will never exceed the cap
- Access to lower propane prices if they should drop in response to the market
- Superior protection compared to fixed price plans offered by some dealers

And, our **Budget Payment Plan...**

- Spreads your fuel costs over 10 months
- Allows you to make predictable monthly payments
- Protects you from the annual budget squeeze that can occur in winter
- Can combine both heating oil and propane into one budget plan

Parker Oil & Propane is always looking out for you and your budget! If you'd like to learn more or sign up for our payment options, [contact us online](#).

\*Capped Price only available to propane customers
