Spring 2017 Parker postings

An electronic newsletter from your
friends at Parker Oil Company

Coming in 2017, Our New Website

These days, more and more customers are visiting ParkerOilCompany.com on their mobile devices. We don't want these customers to miss out on any of the innovative services available to them, which is why we're excited to announce that our website will soon be re-launched with a fully responsive design. **The new design will make it easier than ever** for Parker Oil & Propane customers to get the information they're looking for, access their accounts, schedule services, order fuel and pay their bills online.

Here, you can see a preview of the site's new homepage, with links to five main sections, each of which represents a major segment of our business. Visitors will click Residential Fuel & Comfort, Commercial Fuel & HVAC, Environmental Management Services, First Energy Corporation or Simmons Travel Center to access the section that best meets their needs. Or they can simply log in from the home page to access their Parker account. Our **URL will not change, so keep ParkerOilCompany.com in your bookmarks** and keep checking back, as we expect the new site to go live within the next few months.

Parker Hits It Out of the Park

With baseball season having arrived, we at Parker Oil Company are reminded about the importance of providing **"home-run" service every time we visit your home base**, whether it's for a fuel delivery, heating and cooling system installation, or just routine equipment maintenance. **Our staff doesn't simply "hit for average."** We aim to knock it out of the park every time up. And unlike those big players who strike out as often as they connect, we match our power with precision, so no matter what's thrown our way, we stay on target!

With that said, we would love to hear from you about how we're doing. If you've received All-Star service from Parker over the last few months, please spread the word by leaving a positive review on Yelp or Facebook. If, on the other hand, you received anything less than stellar, please call 800-486-3146 or contact us online, so we can serve you better next time. We appreciate your feedback and thank you for your business.

Making Room in Your Home? How About Some Extra Space in Your Budget?

If you'd like to extend your spring-cleaning efforts to your expenditures, Parker Oil Company's Budget Plan and Capped Price Program are a great place to start.

A **Budget Plan** will divide your annual fuel costs into 10 even monthly payments, so your energy expenses won't spike in the winter. And if you use both heating oil and propane, you can cover the cost of both with one Budget Plan.

Our **Cap Price Program** puts a limit on how high your per-gallon fuel cost can rise. No matter how high market prices go, you'll pay no more than the cap price. And when market prices fall below the cap, you get to pay a lower price.

Heating oil and propane prices typically fall in the spring, so now is the time to get the best deal on propane and heating oil for next season. Visit ParkerOilCompany.com to learn more and call 800-486-3146 to set up your Cap Price or Budget Plan today.

Propane Grilling Safety

Grilling season is upon us, and although propane grilling is one of the safest (and tastiest) ways to cook, there are some safety measures you should always keep in mind when firing up the BBQ.

1. Follow the manufacturer's instructions for safe assembly, use, cleaning and storage.
2. Position the grill in a safe location: outdoors, at least 5 feet from the house, and on a level surface clear of potential fire hazards.
3. Check for leaks at the cylinder using a soapy water solution. Expanding bubbles indicate a leak. Do not use the grill if there is a gas leak.
4. Follow proper lighting and re-lighting procedures. Keep the lid open, don't lean over the grill when lighting, and wait at least 15 minutes before re-lighting.
5. Never leave a lit grill unattended.
