friends at Parker Oil Company

The Power of Parker Oil

Parker Oil has been delivering heating oil to Virginians since 1935 — that's a lot of liquid — and now, **at almost 80 years old, our company is stronger than ever**, thanks in part to the quality of our heating oil and services. Customers continue to choose Parker Oil because:

- Our expert technicians provide **24-hour emergency service**, keeping heating systems working all winter-long.
- Our **budget plan** lets you spread your fuel expenses throughout the year, so you can avoid winter price spikes.
- Our **automatic delivery** service ensures that you should never run out of fuel.
- Our **large fleet** of tank trucks delivers whenever and wherever it's needed.

To experience the power of Parker Oil for yourself, or to get more information on any of our heating services, call 434-447-3146 or contact us online.

THANK YOU SOUTHSIDE, VA

We really can't even begin to express how grateful we are for all of our customers. This winter was challenging for all of us, with extreme weather events making deliveries impossible at times, but you stuck with us through it all, and for that we say, "Thank you from the bottom of our hearts."

As if your patience, loyalty and understanding weren't enough, we were further delighted to see how many of you thoughtfully cleared paths to your fill pipes so that our deliverymen and women could do their jobs safely. Again, thank you. We truly appreciate your support.

Winter Weather Round-Up

We Virginians aren't exactly in the same boat as our friends farther south who rarely ever see snow — we usually get a few inches per year — but **this past winter was definitely one for the record books!** A nasty combination of snow, ice and slush was made even worse by extreme cold fronts that pushed many of our customers' heating systems to the limit. Our phones were ringing off the hook and our distribution system was operating near full capacity, but still **we were able to get you the fuel you needed**, and thanks to our 24-hour emergency service hotline, **several potential crises were averted.**

Therefore, we'd like to take this opportunity to thank all of our customers for their patience, loyalty and understanding, and to thank all of our employees for their hard work and dedication. We couldn't have done it without you.

Limitless Hot Water

That's what you get when you have a **Rinnai Tankless Water Heater** installed by the experts at Parker Oil. Typically, a home's hot water supply is limited to the number of gallons its tank holds. The Rinnai Tankless Water Heater eliminates this problem by eliminating — you guessed it — the tank. This means you can **enjoy a hot shower even with the dishwasher and the laundry both running at the same time ...** but that's not the only benefit. Consider this:

Rinnai Tankless Water Heater:

- Heats water only when you need it
- Is the size of a carry-on suitcase
- Lasts up to 20 years

Conventional Tank-Style Water Heater:

- Heats and reheats water throughout the day
- Typically measures at least 20 square feet
- Usually lasts less than 10 years

With a Rinnai Tankless Water Heater, you'll **save money, water and space**, plus your equipment will be backed by an industry-leading warranty and serviced by the steady hands of Parker Oil's heating specialists. So, call 434-447-3146 to schedule an installation. The sooner you do, the more you'll save.

Rinnai®
